

MULTI-FUNCTION M18 SENSORS

- *Wide versatility of optic functions and connections*
- *High operating distances for all functions*
- *Models with trimmer adjustment and stability LED*
- *Rugged and impermeable plastic housing*

S5 SERIES

The **S5** series offers the most complete range of plastic tubular M18 photoelectric sensors.

The most varied optic functions can be chosen amongst the fixed focus or diffuse proximity models with short, medium or long operating distances reaching 60 cm; the 4 m retroreflex, 3 m polarised retroreflex and 1 m for detection of transparent materials; the 12 m through beam and models with fibre-optic connection.

Different versions with either axial or radial optics are available. The series offers connector or cable connection, with 3 wires Vac or Vdc, or with 4 wires Vdc with complete configuration of the NPN/PNP output and dark/light mode.

A red LED indicating the output status is visible on the bottom side of the sensor.

The versions with trimmer adjustment present also a green LED signalling the switching stability according to the received signal's intensity.

The rugged ABS housing always guarantees IP67 protection.
